

Oleg Kalysh

Senior Software Developer

Email: olegkalysh25@gmail.com **Phone:** +380637269634 **Telegram:** @Miami_3 **GitHub:** Miami3

Senior Software Developer with **10+ years** of commercial experience building scalable web platforms, desktop applications, and real-time systems across Security & Identity Verification, SaaS, Marketplaces, Messaging / Real-Time Communication, and Marketing. Strong expertise in **JavaScript, TypeScript, Node.js, Vue.js**, and modern web architectures. Proven track record in developing cross-platform desktop clients, biometric and security systems, high-load backend services, and performance-optimized web applications. Experienced in full-cycle development: architecture design, frontend and backend implementation, performance optimization, and deployment in cloud environments. Worked in both product companies and freelance environments, delivering measurable business impact through improved reliability, performance, and user experience. Extra skills include real-time communication (WebSockets), Electron applications, cloud infrastructure, and UI performance optimization.

TECHNICAL SKILLS

- | | | |
|---------------------------------------|--------------------------------|--|
| • JavaScript, TypeScript, Vue.js | • AWS, Swagger, OAuth 2.0, JWT | • HTML, JSON, CSS, SCSS, YAML |
| • Vuex, Nuxt.js, Vite, Pinia, Vuetify | • WebSockets, Prisma ORM, GCP | • Markdown, Chart.js, Tailwind CSS |
| • Vue Router, AngularJS, jQuery | • NGINX, Firebase, DynamoDB | • Bootstrap, GSAP, Webpack, Rollup |
| • Node.js, Express, Nest.js, Strapi | • Hasura, API Gateway, Redis | • Babel, Prettier, ESLint, Figma, Jira |
| • REST API, GraphQL, OpenAPI | • MongoDB, PostgreSQL, MySQL | • Docker, K8s, Git, GitHub, GitLab |

EXPERIENCE

KEYO — Senior Software Developer

June 2018 - Present

- Designed and developed a cross-platform ElectronJS desktop application controlling palm-scanning flows and communication with sensor SDKs, used on 50+ deployed devices across customer locations.
- Implemented secure data transfer between desktop client and backend services for biometric verification.
- Built a NestJS-based user management service handling users, roles, and permissions, serving 10,000+ API requests per day with stable performance.
- Developed administrative dashboards and internal UIs for managing users and access rights.
- Migrated the marketing website from WordPress to Vue.js, reducing average page load time by 41.2% and improving Lighthouse performance scores.

Technologies: TypeScript, Node.js, NestJS, ElectronJS, Vue.js, PostgreSQL, WebSockets, Docker, AWS

Aparlay Ltd — Frontend Developer

Jan 2017 - June 2018

- Developed a real-time chat interface using AngularJS, supporting thousands of concurrent messages per day.
- Implemented live messaging, delivery statuses, and notifications via WebSockets.
- Built responsive layouts supporting desktop, tablet, and mobile devices, increasing mobile usage share by 24.8%.
- Ensured smooth UX during high-frequency message exchanges.

Technologies: AngularJS, HTML, CSS, Bootstrap, WebSockets

TRANSFORMIFY Ltd — Frontend Developer

Jan 2016 - Jan 2017

- Implemented core user-facing pages including listings, profiles, and application flows, reducing user drop-off during applications by 16.3%.
- Translated design assets into clean, accessible HTML/CSS.
- Ensured responsive behavior across multiple screen sizes and devices.
- Improved UI consistency and overall visual quality.

Technologies: HTML, CSS, JavaScript

ENGLISH

Upper-Intermediate (B2)

EDUCATION

Kyiv National University of Trade and Economy (2008 - 2013)

Master's degree (Master) Economics
